### **DETAILED ACTION**

1. Claims 1-6 are presented for examination.

#### ***Information Disclosure Statement***

2. The information disclosure statement filed 02/01/2006 is being considered by the examiner. However, the references 8-241338, 11-120000, 2002-318891, 2003-296383 have not been considered because the translation was not submitted.

#### ***Claim Objections***

3. Claims 1-6 are objected to because of the following informalities:

As per claims 2, 4, and 6, the word "A" at the beginning of claims would be better as "The".

As per claim 2, the comma is missing before "and" in line 4.

As per claims 1, 3, and 5, the claim recites the word "good", and it is not clear what a "good" design refers.

As per claims 1, 3, and 5, the phrase "design requirement particulars" and "designer discretion particulars render the claims indefinite because it is unclearly defined how "design requirement particulars" is different from "designer discretion particulars".

As per claims 3 and 5, "previously storing a design rule" and "previously storing a determination" render the claims indefinite because it is unclear how they are different from each other.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 1-6, the claim appear inaccurate or lacking an essential step to be complete. The claims recite the “design result determination” step in line 16 (Claims 1, 3), line 3-4 (Claim 2), line 4 (Claim 4), and line 17 (Claim 5), but not how the design result determination step is performed. It is still unclear how the step of “design result determination” constitutes a “updating the design rule” in line 5 (Claim 2), line 5 (Claim 4), and line 6 (Claim 6).

***Claim Rejections - 35 USC § 101***

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 5-6 are rejected under 35 U.S.C. 101 because they are non-statutory.

They are at best computer program software, per se, lacking the necessary hardware to fall into a statutory category of invention.

*Claim Rejections - 35 USC § 102*

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being anticipated by Li (US Patent No. 6,915,252).

Li teaches (Claims 1, 3, and 5) an automated design method and system (Col. 1 lines 7-10, Col. 4 line 45) for performing automated design of a product using design requirement particulars required with respect to the product targeted for the automated design (Col. 1 lines 14-43), designer discretion particulars by discretion of a designer with respect to design of the product (Col. 10 lines 45-61) and a design rule necessary for the design of the product (Col. 4 lines 46-62 ), characterized by comprising:

design rule storage means for storing the design rule (Col. 4 lines 45-61, Col. 5 lines 50-67, Col. 6 lines 1-11, Col. 11 lines 18-55),

automated design means (Col. 4 lines 44-45 ) for performing automated design using the design requirement particulars, the designer discretion particulars and the design rule (Col. 4 lines 44-61, Col. 10 lines 45-61, Col. 11 lines 18-55),

determination rule input means for inputting a determination rule including a rule to be satisfied by design of the product in the case of manufacturing the product (Col. 4 lines 45-61, Col. 7 lines 42-61, Col. 9 lines 15-40),

determination rule storage means for storing the determination rule (Col. 4 lines 45-61), and

Art Unit: 2123

design result determination means for determining whether a design result obtained by the automated design means is good or not based on the determination rule stored in the determination rule storage means (Col. 4 lines 45-61, Col. 6 lines 59-67, Col. 7 lines 42-61, Col. 9 lines 15-40); and

(Claim 3 and 5) a design requirement particular input step of inputting design requirement particulars required with respect to the product (Col. 5 lines 50-67, Col. 6 lines 50-59, Col. 11 lines 18-55),

a designer discretion particular input step of inputting designer discretion particulars by discretion of a designer with respect to design of the product (Col. Col. 10 lines 45-61),

(Claims 2, 4, and 6) determination result storage means for storing a determination result obtained by the design result determination means, and

the design rule stored in the design rule storage means is updated based on the determination result (Col. 9 lines 30-40, Col. 11 lines 35-55, Col. 13 lines 50-65).
